

BeeSafe

BeeSafe CopperTreat2 (Green - Copper Napthenate Fungicide) and ZincTreat4 (Clear - Zinc Napthenate Fungicide) are safe non-flammable fungicides for use in sensitive areas like beehives, orchards, landscaping and house repairs.

Packs:

5, 20 litre HDPE, 200 litre and 1000 litre IBCs upon request.

Industries:

Kiwifruit and avocado orchardists, hobby and professional beekeepers and fencing/retaining wall contractors.

Key Uses:

Fungicide protection for new or existing timber structures or natural products like rope, cordage, canvas, hessian. Ideal for beehives, potting boxes, fruit and vegetable crates, or export timber packaging.

Recommended to be used for tanalised & lifewood CCA, LOSP, boron or ACQ treatments where timber has been cut, notched, drilled or rebated or exposed heartwood in round posts, piles, landscaping timbers.

Key Benefits:

- Proven and safe fungicide
- Non-flammable solvent carrier
- Minimal odour
- Faster drying
- Ready to use - we mix it so you don't have to!
- Can be used in sensitive areas

Mould Stop

Water Based product made with Boron, Glycol and Quat Biocide given long lasting residual effect. Is not an instant bleach cleaner!

Packs:

5, 20 litre HDPE, 200 litre and 1000 litre IBCs upon request.

Industries:

Councils, contractors, swimming/spa/hot pool operators, roof cleaners, utilities, conservation areas, airport runways, hotels, motels, universities, schools, walkways, retail car parks, piggeries, dairy sheds, food packing sheds, etc

Key Uses:

Water based fungicide for remedial or preventative applications for most building surfaces, ie timber, fibre cement, masonry, concrete, metal, bricks, asphalt, tarmac, weatherboards, roof clay tiles, decramastic tile, iron, driveways etc.

Recommended in sensitive areas. This is not a bleach or harsh corrosive, neutral pH so is safe to use. In most cases results will be seen in several days. Heavily infested lichen or mould will require a longer time period.

Key Benefits:

- Proven the world over
- Water based
- Ready to use - we mix it so you don't have to!
- Neutral pH - non corrosive
- No harmful solvent or acid odour
- Not restricted for professional users
- Wash equipment with water
- Residual effect, keeps on keeping on!

Timber Frame DEFENDER

Water Based product using higher strength Boron/Glycol formulation. High concentration of carrier aids penetration into the complex wood fibres.

Remedial Treatment of timber affected by decay or insecticide attack, or timber that could be susceptible to wood destroying organisms in the future.

Packs:

5, 20 litre HDPE, 200 litre and 1000 litre IBCs upon request

Industries:

Builders using or repairing kiln dried frame, trusses or frame & truss merchants to achieve H1.2 and H2 requirements. Architects, council inspectors, developers, weather tightness experts (ie Branz, Prendos).

Home owners that have to repair own buildings.

Pest controllers and professional users treating borer existing attack or prevention.

Key Uses:

Builder or home handyman applications for wide spectrum fungicide and insecticide treatments.

Pest controller can use to treat insect infestations or preventative rate for insect damage.

Internal frame, trusses, log homes, hardwood native flooring, joinery, piles, bearers, joists, engineered wood products and plywoods etc.

Key Benefits:

- Well proven and safe
- Water based - clean up equipment with water
- Non-flammable
- Minimal odour - homeowner doesn't have to move out
- Fungicide and insecticide in one formulation
- Ready to use - we mix it so you don't have to
- Diffusible action penetrates deep into the wood
- Dries clear so can easily be stained or coated after treatment
- Non-metallic - contains no corrosive elements

Rot Stop

Handy DIY size cartridge for Fungicide and Insecticide Treatments where you need high concentration of active chemical in small area.

Packs:

300ml plastic cartridge - will suit majority of caulking guns.

Industries:

Builders, home handyman, small independent timber merchants or hardware stores.

Key Benefits:

- Handy size for the small jobs (larger jobs can use Timber Frame Defender)
- Proven and safe formula
- Fungicide and insecticide in one package
- Non-flammable
- Ready to use
- Diffusible action penetrates deep into the wood
- Dries clear so can easily be stained or coated after treatment
- Non-metallic - contains no corrosive elements

Key Uses:

Fungicide and insecticide protection for small specific areas like window and doors, piles, poles, joints, notches, rebates etc.

Pest control use for borer treatment in localised or hard to access areas.
